

Quote from W. Milton Police Chief Garry Kimpel

"We were having reliability problems with our old VHS systems. I conducted extensive research looking for a reliable yet affordable DVR in-car system. I had budgeted for replacing 2 units a year based on the pricing of the most common brands. With Eye3data I was not only pleased with the quality and reliability; I was able to purchase all 4 units with the money I had budgeted for 2. I would gladly recommend Eye3data based on performance and reliability alone, but I couldn't beat the price either."
