## Reltima DuraTrac

### Rugged & Weatherproof – The Best in Heavy Equipment Tracking

The Reltima DuraTrac device offers you a valuable tool in exploiting sales opportunities for equipment tracking and remote maintenance management needs. Using the Teluware tracking application, a user may now locate equipment in the field, review comprehensive reports detailing activity and performance and receive alerts for multiple events including theft and off hours of operation. By measuring equipment activity using engine hours, a user may schedule maintenance checks and service points without the need to track hours of operation manually. Weather – tested and ruggedized the device is fit for operation in the harshest of environments.

The **DuraTrac** GPS Equipment Device is equipped to provide the following features:

- A weatherproof, ruggedized enclosure.
- Easy installation.
- Locate equipment quickly and easily.
- Track maintenance and service points by engine hours – remotely.
- Receive alerts via email or text message for theft, excessive use or off hour's operation.
- Review reports for critical equipment performance data.
- Select from several update plans to satisfy your customer's needs.

Coupled with the Teluware tracking system the Reltima DuraTrac device offers equipment security and maintenance tracking of paramount value. Suggested uses include but are not limited to:

- Construction Generators
- Bobcats
- Bulldozers
- Cranes
- Backhoes
- Earth Movers

Your customers can now track their equipment in the same application as their vehicles. Service all of your customer's fleet management needs in one application.
